### Key principles of SQAS

- 1) SQAS is NOT a certification system, but it checks the compliance with certain requirements and records the objective/factual answer to +/- 400 detailed questions
- 2) Questions relate to (European) legislation, industry good practice and improvement possibilities
- 3) Assessment report remains valid for 3 years
- 4) It helps the logistics industry sector
  - > To better comply with regulatory requirements
  - > To improve the QSH&Sec performance to a level that the partner chemical companies desire
  - > To strive towards tomorrow's "state of the art"

**Block IV: Inspection**

*Hosted by Michael Souček, BDM, Intertek s.r.o.*

**INSPECTION AS A TOOL FOR DISCOVERING GAPS AND FURTHER IMPROVEMENT**
